# Derek Li

Lid9@wit.edu | Portfolio https://derekli.tech/ | Rutland, VT/Boston, MA

## EDUCATION

**Wentworth Institute of Technology | Boston, MA**
**Bachelor of Science in Mechanical Engineering** Expected Graduation: Aug. 2028
Minor in Manufacturing

*Related Courses:* Engineering Graphics, Engineering Statics, Mechanics of Materials, Additive Manufacturing

## SKILLS

**Software:** SolidWorks, MATLAB, Python, Bambu Studio, Multisim, Microsoft Office (Excel, Word, PowerPoint)

**Manufacturing & Lab:** Manual and CNC milling, CNC punching, robotic press brake operation, 3D printing, countersinking, tapping, PEM hardware installation, MIG welding, surface finishing, calipers and micrometers

## WORK EXPERIENCE

**Kalow Technologies | Rutland, VT | Fabrication Intern** Summers 2025 & 2026

- Regularly completed urgent fabrication requests while managing scheduled work, helping each department stay on or ahead of schedule during rotations.
- Set up and independently operated a robotic press brake to form sheet metal components from engineering drawings.
- Operated CNC punching equipment, verifying tooling and part dimensions before production runs.
- Performed countersinking, tapping, PEM hardware installation, surface finishing, and powder-coating preparation.
- Collaborated with fabrication teams on production work and helped train fellow interns in machine operation.

**Upward Bound (through AmeriCorps) | Castleton, VT | Mentor** Summer 2026

- Completed 450+ service hours, mentoring and supervising 28 students in a residential college-preparation program.
- Planned group activities, supported college visits, and helped lead community service projects such as sanding and painting bleachers.

## PROJECTS

**Kitchen Aid Arm | Engineering Design (Group)** Jan. 2025 - Apr. 2025

- Designed and refined a wall-mounted arm in SolidWorks with a team and built a 3D-printed prototype.
- Tested sustained loads of 35 oz at the starting length, 20 oz at full extension, and 28 oz across tested heights without loss of grip or support.
- Completed the project for $10 against a $50 budget, finishing $40 (80%) under budget.

**Wall-Mounted Can Crusher | Engineering Graphics (Group)** Sep. 2025 - Dec. 2025

- Created SolidWorks part models, assemblies, and engineering drawings for a team design project.
- Modeled components as a complete CAD assembly to show how the system fits and functions, then presented the design with the team.

## CLUBS/ORGANIZATIONS

**Wentworth Society of Manufacturing | Vice President**

- Guided students in manual and CNC milling to produce Turner's cubes, using calipers and micrometers to check dimensions.
- Helped teach SolidWorks workshops and assisted students with 3D modeling exercises.
- Organized CNC programming meetings to prepare students for machining labs and represented the club at Wentworth Day.
